

[Opency For Mac Eclipse](#)

## Create, manage, and run configurations

The screenshot shows the Eclipse IDE's Run Configuration dialog for a C/C++ application named "HelloOpenCV". The dialog is divided into several sections:

- Name:** HelloOpenCV
- Program arguments:** A text area containing "src/lena.jpg". A "Variables..." button is located at the bottom right of this section.
- Working directory:** A text field containing "\${workspace\_loc:HelloOpenCV}". Below it is a checked checkbox labeled "Use default". At the bottom of this section are three buttons: "Workspace...", "File System...", and "Variables...".
- Buttons:** At the bottom of the dialog are "Apply", "Revert", "Close", and "Run" buttons.

The left sidebar shows a project tree with "C/C++ Applications" expanded, listing several "HelloOpenCV" configurations and a "Launch Group". A filter bar at the top of the sidebar contains the text "type filter text".
